

ALEXANDER IVANOV

Front-End Web Developer

OBJECTIVE

Middle JavaScript programmer experienced in developing web apps on React, Angular and Vue. Able to write unit and E2E tests, perform code review, set up project structure and configure build tools. Familiar with Node.js and back-end practices, SOLID principles and design patterns.

Have worked in small (5-10) and large (20+) Scrum teams, participated in product demo sessions and conducted knowledge transfer sessions.

Seeking to build reliable and performant web applications using modern tech stack. Curious to apply best practices to familiar problems and find creative solutions for unfamiliar ones. Interested in systems design and UI/UX design. Happy to discover and share knowledge.

EXPERIENCE

EPAM, August 2021–Now

Content hub for marketers

- Increased FE test coverage from 24% to 75%.
- Wrote documentation for local setup and launch of the FE app.
- Suggested and implemented UI improvements.
- Contributed to architectural decisions of certain features.

International online store

- Developed features and fixed bugs of a microservice e-commerce web app.
- Improved UI reliability and performance.

Action Engine, July 2020–August 2021

Real estate trading platform

- Developed dashboards with data visualization, marketplace filters and dynamic recursive form apps.
- Automated Python to JavaScript code conversion.
- Participated in integration of FreshDesk support system.

Freelance & Pet Projects

FABLE Jacket Constructor

A user interface for building a winter jacket of custom color combination.

Maple Season

A Vue SPA website with routing, lazy loading and a custom music player.

Face Recognition Project

A full stack React/Express/PostgreSQL web app that uses Clarifai API to detect faces in images.

EDUCATION

EPAM Learning & Development

Mentee in React, Node.js, Clean Code and Clean Design courses.
Mentor in JavaScript basics course.

MERA Summer School

UNIX, testing basics, version control systems, network protocols.
2nd place in front-end final project competition.

Nizhny Novgorod State University

Faculty of Computational Mathematics and Cybernetics, 2011–2014.
